

SFBA 2/2

Double Foil / Double Bubble

SuperFOIL

Thermal Insulation for use in Roofs, Walls, Floors & Partition Walls

SFBA 2/2
SuperFOIL

Easy to install

CFC / HCFC free

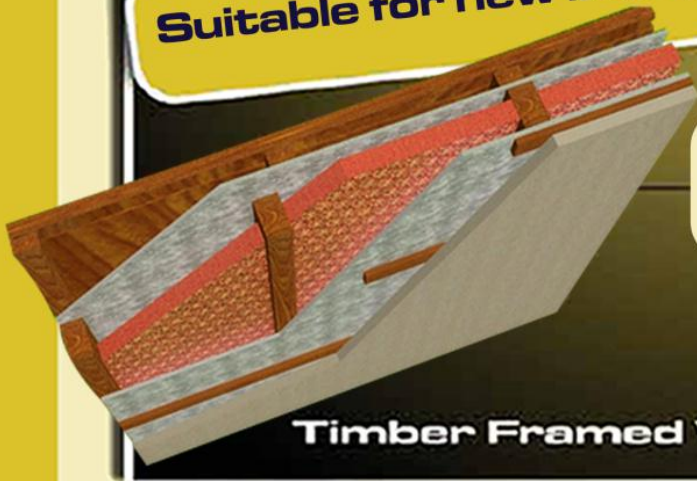

Reduces noise pollution

Water & Vapour resistant

Fully recyclable

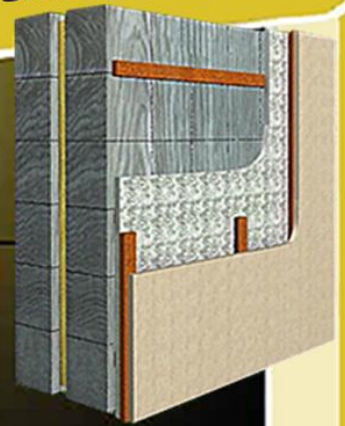

Resistant to corrosion

Suitable for new build, refurb or renovation projects

Timber Framed Walls

SFBA 2/2
SuperFOIL

Block Walls

Quality System Manufactured to
ISO 9001:2008

STANDARDS

SuperFOIL

**Thermal Insulation for use in Roofs, Walls,
Floors & Partition Walls**

SFBA is one in a range of SuperFOIL products designed to maximize insulation performance with a quick and easy installation.

SFBA is a multi-layer air bubble insulation with aluminium bonded to both surface's. The coated aluminium faces offer durability and protection against corrosion to give a waterproof insulation system.

SFBA is a leading bubble foil insulation. It can be used for insulating under floors, in walls, in dry linings such as for cellars and can also be used in greenhouses and other industrial applications.

SFBA is a high performance insulation which utilises low emissivity air gaps to maximize the thermal capabilities

SFBA reflects heat, just like a mirror reflects light. SFBA is an ideal radiant barrier for supplementing existing insulation to keep your house warmer in winter and cooler in summer.

SFBA boosts existing insulation values by up to the equivalent of 55mm polystyrene in 1 thin layer when installed according to the manufacturers guidelines with low-e air gaps either side.

SFBA enhances U-values in traditional cavity wall construction to meet and/or exceed current building regulations.

SFBA sales & technical support, data and installation guides are available by calling 01636 639 900

SuperFOIL's Easy Installation Makes SFBA A DIY Favourite

	Roll Size	Thickness
Floors / Roof / Walls / Lofts		
SFBA 2/2 Double Foil / Double Bubble	10m x 0.6m	6mm
	25m x 1.2m
